1.10 LUBRICATION SYSTEMS – CONSTRUCTION MACHINES

BEKA-MAX  
Lubrication  
System Display

Construction Machines

The Beka Max Construction Machine demo board provides a point of sale marketing tool to promote lubrication systems sales.

Compact design enables the demo board to fit in almost any available space and presents the look and feel of the Beka Max system with a pump that actually spins around and divider valves with the actual hose and fittings used on typical installations.

Below the lubrication system components concise bullet points on why lubrication systems should be considered and key performance information have been listed.

Holders for business cards and brochures are also included to make the display complete.
