## Piusi 1" BSPF Diesel Filter with Steel Bowl - 150 L/min

The 611110 Piusi 1" diesel filter with steel bowl separates and filters water and particles. The delivery filter is a water absorbing cartridge that guarantees the fundamental protection of motors using diesel. The 611110 Piusi 1" diesel filter with steel bowl can be fitted to both the suction and delivery side of the system, ensuring that the diesel that is transferred is free of particles and water. The 611110 Piusi 1" diesel filter with steel bowl has a maximum flow rate of 150 L/min and a maximum operating pressure of up to 50psi. Included is 1 filter head and 1 filter element.

This diesel fuel filter is popular with high flow pumping systems and is installed simply by spinning on the cartridge making replacing the filter an easy task.

### PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Capable of delivering flow rates of up to 150 L/min

Max. pressure 50psi (3.5bar)

Suitable for use with diesel

Removes water & particles

Filtration down to 30 micron

For use with pumps up to 150 L/min

Inlet/Outlet - 1" F Flanged BSP

Filter Thread - 1 1/2"-16 F UNF

Includes 1 x filter head and 1 x filter element
