Alemlube 6000 Series Header Blocks

The Alemlube 6000 Series range of header blocks includes both bare and completely assembled header blocks.

These high quality header blocks are manufactured from zinc plated mild steel and are available to accommodate one, two, three, four, five, six or eight grease nipples and straight connectors to suit 6mm grease tube.

Also available manufactured in 304 stainless steel, the Alemlube 6000 Series header blocks form a vital, integral part of any grease lubrication application.
