INFORMATION

Pulsarlube M Series Single and Multi-Point Grease Lubricators M250/MAIN-N (250ml), M500/MAIN-N (500ml)

September 2023

The new and improved design Pulsarlube M Series offers better performance with user friendly controls and in-built features for economic multi-point lubricating.

The M250/MAIN-N (250ml) and M500/MAIN-N (500ml) vertical feed lubricators have improved error sensing capabilities when operating under high pressure.

The Pulsarlube M Series lubricators have improved dust protection to meet IP65 standards, improved protection against water, improved protection preventing grease and oil leaking inside the body and improved LCD displays and button controls.

The Pulsarlube M series offers better performance to previous models and equivalent multi-point grease lubricators. The outstanding 30 bar to 60 bar pressure ensures continuous high performance with a user friendly LCD button control system.

SPECIFICATIONS, FEATURES AND BENEFITS

- 250ml and 500ml sizes along with smaller sizes available upon request
- Up to 8 multi-point use using progressive divider blocks
- IP65 Ingress protection
- Connecting thread 3/8" BSP(m)
