EL SERIES

March 2024

The EL Series SC60040IWC single IBC and SC60050IWC double IBC Protection Covers are the ideal way to protect your IBC's from rain, dirt, dust and the harsh UV of the Australian sun.

Did you know that your IBC spill containment will be severely compromised if it fills with rainwater? An IBC cover prevents rainwater ingress from reducing the containment volume within the IBC bund.

UV protection for sensitive products such as Adblue is a must too.

Made from strong, tough and durable material, the covers are designed to ensure heavy-duty all-round protection.

The two covers come with a Velcro access flap on the top for easy access to the inlet lid without having to take the cover off. Likewise, a front Velcro flap allows easy access to the outlet spout, without having to take the cover off.

An elastic pull tight cord ensures the covers stay on the IBC and they are 3/4 in height so that instant access is available via a forklift.

The covers are yellow in colour for easy identification and are a generic size to suit most IBC's on the market. They are also the ideal match for our new EL Series spill containers.

SPECIFICATIONS, FEATURES AND BENEFITS

- Prevents rainwater from reducing the containment volume within the IBC bund
- Keeps weather, dirt, dust, sand out and UV off sensitive products like Adblue
- Velcro flap on top to access inlet lid
- Velcro flap on front to access outlet spout
- Protects your IBC from weather, dirt, dust & damaging UV
- Pull tight elastic cords to ensure your cover stays on
- 3/4 height for easy forklift access to your IBC
- Complies to Australian storage & handling standards AS 1940-2017
