## Bi-Lobe Refuelling Drum Pump

The Alemlube EL Series F20060 bi-lobe refuelling drum pump is an easy to operate, fully serviceable drum pump capable of delivery rates of up to 100 litres per minute.

Featuring a smooth and precise rotary action, the F20060 is supplied standard with a heavy duty machined bung adaptor, nozzle, built in nozzle holster and superior grade delivery hose.

Minimal effort is required to generate high flow rates of up to one litre per rotation due to the advanced bi-lobe design.

Ideal for the fast and efficient transfer of diesel fuel, kerosene and oil up to SAE30, the F20060 bi-lobe refuelling drum pump available from Alemlube is the pump of choice for road contractors, broadacre farmers and forestry workers where fast and efficient fuel transfer of off-road vehicles and large machinery is always considered a must.
