52050

12V In-line Diesel Fuel Transfer Pump

February 2022

The 52050 12V in-line diesel fuel transfer pump is a self-priming electric pump capable of flow rates of up to 50L/min.

Manufactured in Italy by Piusi, the 52050 is portable thanks to its convenient carry handle and is designed for high flow diesel transfer applications in a wide range of transport, industrial, agricultural and infrastructure applications where only 12V power is available.

Heavy duty robust construction ensures total reliability of the 52050 and the pump operates within a duty cycle of 30 minutes on and 30 minutes off at a maximum working pressure of 22psi (1.5 bar).

Installation via the 3/4" BSP inlet and outlet can be performed simply and effectively to suit individual requirements.

SPECIFICATIONS, FEATURES AND BENEFITS

- Flow rates of up to 50L/min
- Self-priming 12V electric pump with on/off switch
- Sturdy handle for convenient portability
- Duty cycle of 30 mins on / 30 mins off
- Maximum working pressure of 22psi (1.5 bar)
- BSP(f) inlet & outlet connections
- Watts: 300
- RPM: 2,900
- Amps: 24
- Weight: 4.2kg

Also available:

52051 24V In-line Diesel Fuel Transfer Pump

- Flow rates of up to 50L/min at 24V & 30L/min at 12V
- Watts: 310
- RPM: 2,900
- Amps: 13
