670AN5

20V Lithium-ion Cordless Grease Gun

The new 670AN5 20V Lithium-ion cordless grease gun from Alemlube is an extremely innovative grease gun with built in intelligence and now a new and powerful 4.0Ah battery as standard.

The only cordless grease gun kit complete with charger and 4.0Ah battery on the market ready to go, the 670AN5 can dispense up to 35 x 450g cartridges at low speed or 31 x 450g cartridges at high speed per charge. As such, it's a must for any busy maintenance facility. It's smart too. An LCD shows real time battery capacity, grease level, grease metering information, loss of priming and stall warning with the press of a button to assist the user in always being prepared to have a fully operational grease gun at hand to be active on the job.

Designed and engineered by Alemite USA, the 670AN5 is capable of developing a maximum operating pressure of 10,000psi (690 bar) facilitating fast, efficient greasing and offers dual flow rates, high at 170 g/min, low at 113 g/min.

Two Lithium-ion batteries are supplied as standard, 1 x 4.0Ah and 1 x 2.5Ah with fast recharging so you'll never be without greasing power to complete your ongoing work.

Lightweight and ergonomic, the 670AN5 is supplied complete with a 900mm long grease gun flex, a heavy duty coupler and has the versatility of three way loading, 450g cartridge, bulk grease or filler pump.

A 400g version is also available as the 597D to suit all USA and European sized grease cartridges.

Protected in a durable plastic moulded carry case, the 670AN5 20V Lithium-ion cordless grease gun provides you with an intelligent and trouble-free high pressure, high volume greasing solution.

PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Powerful 4.0Ah battery plus 2.5Ah spare battery supplied as standard

Delivery rates of up to 170 g/min

Grease pressure of up to 10,000psi (690bar)

Suitable for use with NLGI1 and NLGI2 greases

Up to 35/31 cartridges per battery charge, low speed/high speed

Built in Intelligence

LCD for real time battery capacity, grease level and grease metering

Loss of priming and stall warning indication

Dual flow rates : 113 g/min and up to 170 g/min

Three way loading: 450g cartridge, bulk grease or filler pump

LED light with on/off control

Ball and needle bearings

Curved slot yoke optimises mechanical efficiency

Case hardened piston for wear and bend resistance

Impact resistant LCD lens surrounded by impact absorbing bezel

Patented air flow management optimises motor and transmission life

Shape, weight and balance designed for less physical strain
