

AACMAC039

Refrigerant Analyser with Printer

September 2019

The Alemlube Automotive AACMAC039 Refrigerant Analyser with Printer is the most precise handheld instrument ever manufactured for determining the purity of R1234YF and R134A for the automotive industry market.

This instrument quickly and accurately determines refrigerant purity in refrigerant storage cylinders or directly in vehicle air conditioning systems.

The Analyser is supplied with R134A & R1234YF sample hoses, thermal printer, built in Lithium-ion battery, 240V AC power transformer housed in a rugged, portable, storage case.

A large graphic display makes for easy reading and operation.

The Alemlube Automotive AACMAC039 Refrigerant Analyser then prints out the test results quickly and concisely.

SPECIFICATIONS, FEATURES AND BENEFITS

- Gas analyser SAE approved for R-1234yf and R134a
- Quickly & accurately determines refrigerant purity
- Ultra-fast 70 second test time
- Easily prints test results with the built in printer
- Large graphic display with on screen instructions
- Internal, rechargeable Lithium-ion battery for cordless operation in any location
- USB port for connection to the AC machine & remote software updates
- Advanced ergonomic design
- Fender friendly resting surface
- Hard shell carry/storage case
