AA6631

Alemlube Automotive Automatic Direct Drive Tyre Changer

June 2022

The AA6631 Alemlube Automotive Automatic Tyre Changer is a technologically advanced, robustly constructed machine featuring a pneumatic operated tilting column and tubeless tyre inflating system.

Pneumatic locking of both vertical and horizontal distance contribute to superior efficiency of the AA6631 Alemlube Automotive Automatic Tyre Changer presenting the user with greater time management benefits.

A quick air booster ensures that the tyre and rim are jointed instantly which is especially suitable for working with low profile tyres. The large 26" turntable is another great advantage when the demand for low profile tyre changing is a high priority in the workshop.

Perfectly described as bigger and better, the AA6631 Alemlube Automotive Automatic Tyre Changer with its 360° bending special rotary type shovel press, longer body is today's tyre changer of choice.

SPECIFICATIONS, FEATURES AND BENEFITS

- Pneumatically operated tilting column
- Tubeless tyre inflating device
- Large 26" turntable suitable for low profile tyres
- Outside clamping: 12" - 23"
- Inside clamping: 14" - 26"
- Air supply: 8bar
- Bead breaker force: 2,500kg
- Maximum wheel diameter 45" (1,143mm)
- Maximum wheel width 16" (406mm)
- High strength steel pedal
- Centring device keep the tyre and turntable in one concentric circle
- Weight of 345kg
