372400

Samoa Mobile Waste Oil Drainer

July 2023

The Samoa 372400 mobile waste oil drainer from Alemlube is a simple, efficient and cost effective solution for collecting waste engine oils and fluids when positioned under a vehicle being serviced.

The 372400 captures the gravity fed waste automotive oil or fluid in its 20L capacity collection bowl which is in turn stored in the unit holding tank with a capacity of 100L. The uniquely designed and molded collection bowl can also be used to hold sump plugs, bolts, filters and washers and workshop tools.

Discharging waste from the 372400 holding tank is achieved by utilising a 1.5m hose pressurising the tank at 3.5psi (0.5 bar) using a tyre inflator. To avoid over pressurising the unit a safety valve is included to address all OH&S concerns.

The 372400 is fitted with a telescopic tube so that the collection bowl can be adjusted from a maximum working height of 2,000mm to a minimum of 1,400mm subject to whether the unit is being used to collect waste oil or fluids under a vehicle hoist or inside a lubrication pit.

Mobility is the key for convenience, efficiency and productivity in busy workshops and around service bays. The 372400 Samoa waste oil waste drainer definitely ticks these boxes and can also be used to collect gear oil, antifreeze and coolant.

PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Premium quality, European engineering

For gravity feed waste oil and fluid collection

Collection bowl capacity of 20L

Holding tank capacity of 100L

Maximum working height of 2,000mm

Minimum working height of 1,400mm

For use under a vehicle hoist or in a lubrication pit

Pressurised discharge from the holding tank at 3.5psi (0.5 bar)

Tyre inflator used for pressurisation

1.5m long discharge hose

Safety valve activates to avoid over pressurisation

Collection bowl designed to hold tools, plugs, bolts, washers and filters

Steel tank with epoxy powder coating

360° positionable composite extension for wider reach

Anti splash grid perfect to hold used filters for draining

Two reinforced castors and two reinforced fixed wheels

Collects waste engine oil, gear oil, antifreeze and automotive coolants
