610A Speedy Grease™ Gun

The Alemlube 610A Speedy Grease™ Gun is arguably the fastest and most reliable grease gun available in the country today.

The patented Italian technology generates exceptional pressure of up to 11,200psi (800bar) and 2.5cc of grease per shot - that's twice the volume dispensed per stroke by your average traditional grease gun.

The Alemlube 610A Speedy Grease™ Gun features an extra strong magnet stand with the magnetic power of 60kg. Simply place the grease gun on farm machinery or construction equipment and easily dispense grease with one hand. Extra long levers ensure high working pressures with less effort.

The Alemlube 610A Speedy Grease™ Gun is sturdy, durable and light weight at 1.6kg.

Included is an 80cm long flexible grease gun extension with spring support and a heavy duty 4 jaw coupler inclusive of a plastic cover to prevent dirt ingress and contamination. The 610A is suited for use with a 450g grease cartridge.

With no wearing parts and no waste, the Alemlube 610A Speedy Grease™ Gun is a quick, easy and clean greasing solution suitable for transport, agricultural, earthmoving and mining applications.

PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

High volume, high pressure greasing

2 hand or 1 hand operation

Grease pressures of up to 11,200psi (800bar)

Delivers up to 2.5cc of grease per stroke

Suits 450g grease cartridge

Powerful magnet attaches the gun to any flat metal surface
