

## PRODUCT INFORMATION

June 2018

# CMAC001 Electronic Refrigerant Gas Leak Detector

The CMAC001 Electronic Leak Detector identifies leaks as small as 0.75grams. A flashing LED leak alarm near the sensor tip alerts the user to the leak and a numeric display screen will indicate the size of the leak from 1-9. Along with a low battery indicator.

The CMAC001 Electronic Leak Detector senses all HFC, HFO, HCFC and HC refrigerants and comes in a sturdy aluminium framed carry case for the protection and long life of the detector.

### PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Senses all HFC, HFO, HCFC, and HC refrigerants, and blends,

Detects leaks as small as 0.75 grams per year of R1234yf (1.5 grams p.a. of R134a)

Numeric display screen with leak size indicator (1 to 9)

3 Sensitivity levels Low/Normal/High

Visual flashing LED leak alarm near the sensor tip

Long 43 cm Probe

Sensor life +300 hours

Warm up time under 20 seconds

Audio mute function

Supplied with 4 x AA batteries with battery life of 8 hours continuous use

Low battery indicator

Aluminium framed carry case

Design certified to meet SAE J2791, J2913 & EN14624

Made in the USA
