## Samoa Heavy Duty 1-1/2" Spring Rewind Hose Reel

The Samoa 508890 heavy duty 1-1/2" spring rewind hose reel is a bare reel and has been designed, engineered & built for maximum durability when fast and efficient very high volume delivery counts.

Accommodating up to 15m of 1-1/2" hose, the extremely robust all metal construction of the 508890 hose reel can be used for low pressure delivery of large volumes of water, diesel and hydraulic oils/lubricants in applications aligned with watering, diesel distribution, lube trucks, mining & construction sites, quarries, marine and aviation.

Manufactured utilising 4mm gauge steel, the wide base arms and shaft form a very rigid and stable structure and the full port, low flow restriction 1-1/2" nickel protected shaft and swivel contributes to reducing fill time and overall improved efficiency.

The Samoa heavy duty 1-1/2" spring rewind hose reel represents the ultimate in large scale hose reel reliability and performance.

### PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Heavy duty extremely robust construction

Working pressure of 600psi (40bar)

Full port 1-1/2" nickel protected shaft and swivel

1-1/2" goose neck hose connection eliminates hose collapsing and kinking

Spool mounted on two permanent lubricated ball bearings ensures reduced torque load for smooth operation

Dual power spring for fast and effective hose coiling

Large effective radial latching area

Zinc plated steel hose outlet rollers for maximum durability

Polyester powder coated for increased wear and weather resistance

Outlet assembly can be mounted in 2 positions

Outlet thread: 1-1/2" BSP(f)

Inlet thread: 1-1/2" BSP(m)

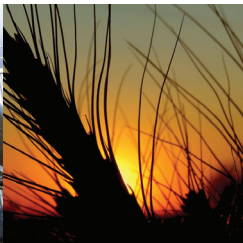

Weight: 55kg
