

U-290

Alemlube Automotive Electro-Hydraulic Truck Tyre Changer

March 2019

The Alemlube Automotive U-290 truck tyre changer has been designed and manufactured specifically to perform tyre changing operations on trucks, buses, earthmoving vehicles and other commercial vehicles.

Automatic electro-hydraulic operation of the U-290 truck tyre changer incorporates a moveable tyre platform controlled by a control unit and clockwise & anti-clockwise clamp rotation across a range of 14" to 26".

Versatile features include the lifting arm and tool carrier arm moving simultaneously in addition to a moveable control unit.

Combine these with reliable, sturdy construction and the U-290 is set apart from lesser featured heavy duty truck tyre changers on the market today.

SPECIFICATIONS, FEATURES AND BENEFITS

- Automatic Electro-hydraulic operation
- Clockwise & anti-clockwise clamp rotation
- Moveable control unit
- Automatic fast turning
- Simultaneous movement of lifting arm & tool carrier
- Handles rim sizes from 14" to 26"
- 1.5kW pump motor
- 2.2kW rotating motor
- Maximum tyre diameter of 1200mm
- Maximum tyre width of 700mm
- Maximum tyre weight of 500kg
