October 2016 Update

AB80010 AdBlue® IBC 240V Dispensing Kit

The AB80010 AdBlue® IBC dispensing kit is mounted on a stainless steel base that conveniently and securely attaches to the side of an IBC.

Consisting of a 240V AdBlue® pump capable of transferring up to 28 L/min, a plastic manual nozzle with poly nozzle holster, 1.5m x 3/4" EPDM/PVC suction hose and 6m x 3/4" delivery hose, the AB80010 is one of the most efficient means of keeping a transport fleet reliably and consistently supplied with AdBlue® for on-the-go productivity.
