

73900

## 700L Twin Skinned Self Bunded Oil Tank

October 2019

**The Alemlube 73900 700L Twin Skinned Self Bunded Oil Tank is the optimum solution for the storage and disposal of oils in industry, construction, agriculture and general all purpose applications.**

Offering maximum storage volume with minimum space requirement the 73900 has been manufactured encompassing double-walled safety through a non-corroding inner container of HDPE with SMP odour barrier and a robust outer container of galvanised steel.

The steel outer skin with 100% retention capacity is hot-dip galvanised on both sides, folded and welded at the base.

A galvanised tubular frame is ideal for floor venting and well positioned, secure handles facilitate ease of handling and potential re-positioning as required.

Suitable for storing pure plant-based oil and heating oil with biological additives, the 73900 700L Twin Skinned Self Bunded Oil Tank is also suitable for the storage of biodiesel.

**SPECIFICATIONS, FEATURES AND BENEFITS**

- 700L capacity
- Suitable for storing pure plant-based oil, heating oil and biodiesel
- Double-walled safety
- Non-corroding polyethylene inner container
- Inner SMP odour barrier
- Fully hot-dip galvanised steel outer skin
- Galvanised tubular frame for floor venting
- Attached handles for ease of handling
- Length of 1,135mm
- Width of 727mm
- Height of 1,100mm
- Weight of approx. 62kg
