318004 20L Plastic Drum Tap

The 318004 plastic 20L drum tap available from Alemlube is a positive action, easy to use device suitable for fitting to 20L drums. Simply remove the main drum lid, screw on the tap and place the drum in the gravity feed position. Ideal for use with low volume workshop fluids the 318004 plastic 20L drum tap will not rust or corrode and changes from closed to a full flow position in a quarter turn of the lever. Inexpensive and long lasting, the 318004 20L plastic drum tap is an essential accessory for all general fluid pouring and transfer requirements in the workshop and onsite in the field.
