B.SMART SELF SERVICE 100

Your Flexible and Modern Fuel Management Solution

Piisi

B.SMART • Bluetooth Smart Fuel Management System

February 2020

Piisi B.SMART is an intuitive and simple Smart Fuel Management System comprising hardware and software driven by Bluetooth technology to easily monitor and manage diesel fuel usage in a fleet of any size, large or small.

Utilising a smart device App for drivers and a Web App on the Cloud for fleet managers, the new Piisi Smart Fuel Management System with its integrated software is fully managed in the Cloud meaning that no complicated PC installation is required to get you up and running.

B.SMART allows you to manage your fleet from anywhere and to monitor all fuel transactions in real-time.

- Once the user opens the B.SMART App the Android or iOS mobile device automatically connects to the fuel station to allow the driver to refuel
- During fuel delivery, the driver can monitor the quantity dispensed directly on the mobile device and once completed can view the virtual receipt which will be sent in real-time to the Web App
- The Fleet Manager will be able to monitor in real-time all the deliveries made through the simple and immediate graphic interface of the Cloud software

SPECIFICATIONS, FEATURES AND BENEFITS

- As the Piisi B.SMART software is Cloud based, it does not require any installation on a local PC to allow Fleet Managers to check the site from anywhere and monitor fuel transactions
- Suitable for any fleet size, single and multi-site
- Simply open the App on any Android or iOS smart device which immediately connects to the dispenser to start the refuelling operation
- Once refuelling is stopped, a receipt is displayed on the smart device, and in real-time on the manager's Web App
- The App is connected via Bluetooth and works even if no network is available
- Quick and easy to use, saves time and money
- Integrates with Piisi Cube bowsers and Piisi MCBox
- Suitable for diesel dispensing in agriculture, automotive, mining, construction, transport, logistics and industrial sectors
