51090 - 2.0 Diesel Fuel Dispenser Kit

The new Self Service Management 2.0 software is the most advanced response for management and monitoring of refuelling, allowing supervision of drivers, vehicles and fuel tanks.

Setting up the system and getting to work has never been easier: **simply connect the devices to your LAN or Wi-Fi network** and click on the "Detect System" button on your PC. Self Service Management 2.0 will handle the rest.

Self Service Management 2.0 is available in a broad range of versions developed to meet all needs, from small systems to the largest installations.

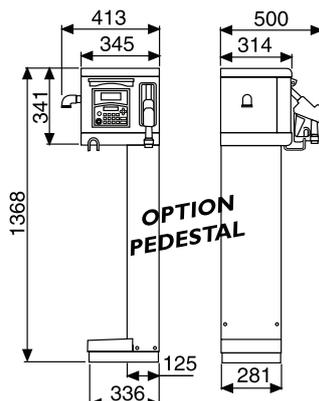

PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Fully integrated dispensing and electronic fluids management system will record:

- Date / time and quantity of fuel dispensed
- Operator details
- Vehicle details
- Odometer or engine hour reading
- Equipped with a standard LAN connection to allow constant dialogue with the software
- Receive configuration mode data from a remote location and transmit fuel delivery reports
- **An additional Wi-Fi kit is required for wireless communication with the unit**
- Can manage up to 1000 numbers of vehicles & monitor their fuel efficiency

From you PC you can:

- 1 - administrate the system:** real-time monitoring of the operation of each device connected directly to the LAN or Wi-Fi network
- 2 - supervise tanks:** real time information on the quality of liquid in each tank
- 3 - monitor users:** complete users database with facility to limit access to fuel
- 4 - manage vehicles:** anomalous consumption alarm, advanced reports
- 5 - generate reports:** by tank, fluid type, driver, vehicle or category
- 6 - DASHBOARD.** Key data is grouped together in this summary page
