# 640020

## Heavy Duty 3/4" Oil Control Valve with Flexible Extension

The new 640020 heavy duty 3/4" oil control valve with flexible extension was designed with true high flow oil dispensing in mind. Made in Italy by Piusi, the 640020 oil control valve was developed for heavy duty working conditions and applications such as lube trucks, mine sites and other applications where extreme conditions are found. It is perfect for anyone requiring high flow rates, low flow resistance and ease of handling and use. The aluminium body is shock resistant, ergonomic and compact. The valve is balanced to reduce pressure on the trigger to make the gun extremely easy to use. The 640020 heavy duty 3/4" oil control valve has amongst the highest flow rates of any 3/4" guns on the market today.

### PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Capable of delivering flow rates of up to 90 L/min

Max operating pressure 1450psi (100bar)

Burst pressure 4350psi (300bar)

Flow resistance 8.7psi (0.6bar) at 60 L/min

Trigger operating force at 1450psi (100bar): 9kg

Swivel at entry with strainer filter

True 3/4" fluid path from inlet to outlet

Inlet strainer filter included

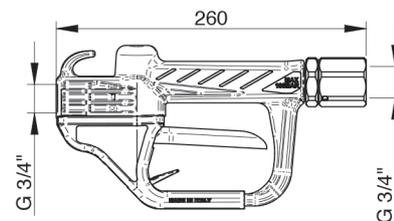

True 3/4" automatic non-drip gun

Lockable on/off trigger handle

Automatic non drip nozzle

Suitable for oil up to SAE 240

Weight: 2kg

### ORDERING INFORMATION

640020 Heavy Duty 3/4" Oil Control Valve with flexible extension

Also available with rigid extension model 640010.

Also available complete with high flow 3/4" inline meter.
