AA1000N-2C-1000W-1C
Oil Tank with 2 x 500L
New Oil & 1000L Waste Oil

March 2021

Alemlube Bench Tank Kits provide positive workshop benefits by combining oil storage and a workable benchtop in one space saving, transportable unit. These well-designed kits are professional in appearance, practical in day-to-day use and purpose built to fit existing or new workshop fitouts that can be planned, installed and commissioned by Alemlube.

500L, 1,000L, 1,500L oil storage & dispensing tanks can be manufactured to suit your specific requirements and are supplied with bench tops with 3/4", 1", 2" or 3" BSP male or female delivery ports.

Your choice of bench tank with 3:1 ratio oil transfer tank pumps with pick up tube can be configured to include a gantry supporting spring rewind oil hose reels with electronic oil meters.

Available as single skin with twin skin versions also available, the Alemlube oil storage and dispensing bench tanks represent a positive step forward in workshop efficiency and productivity.

Also in the mix, complying with EPA and Australian Standards requirements, Alemlube can provide you with a cost effective Workshop Fitout complete with market leading equipment, compressed air, water and waste oil storage, delivery and metering solutions.

SPECIFICATIONS, FEATURES AND BENEFITS

- Premium Alemlube design
- One, two or three compartments with 500L capacity
